## Opening Story:

This year has been a year like no other. It has taken many different turns that we never expected. There have been many different challenges this school year as in having to do school over Zoom, but luckily the school has made an effort to have the option to let students come to school in masks and taking precautions making sure to stay six feet away from each other. No matter what happens, Gulliver always makes everything turn into a very fun school year. Whether it be from school, home, France, to London, or anywhere else internationally students are trying their best to succeed and learn this school year.

# Chronological order

We only have 10 months in the school year. So, our yearbook could be divided into those ten months and then after those ten months we could show the yearbook photos and other stuff.
