

# It's Just US

By : Monica Chao, Fran Binello, Angelina Gouchee, Kajsa Brion, and Conrad Weeman

# Theme

As we opened those doors on the first day, excitement filled our bodies. A brand new start to the year with everything renewed. From the building to the renovated classrooms, campus was looking better than ever. Although everything was new, we were still ourselves. We found our true potential. We focused on ourselves and how we've overcome all the tough obstacles thrown in our way over the past few years. To making a new version of ourselves, finding our passions, from art to academics made new friends and found our true potentials. We're on a journey to finding ourselves.

We changed everything. Our energy and hope fought back, and as we opened those doors on the first day everything felt like it was before. We're not focused on the past but for what's ahead.

Back to Gulliver tradition spooky grams and contest. Everyone bonding together as the 8th graders returned to Washington D.C, Secrets Santas roaming the halls, and showing our spirit strongly threw spirit week.

The end of the year approaching. Summer on everyone's mind. We have found ourselves. Our time here has marked its place in our hearts and especially for the 8th graders who has had a memorable last year and the academy.
