Theme

Description: These colors go very well and represent the city of Miami. When you go out you will see these colors and palm trees. It makes you think you are living the dream by how beautiful it is, and going to gulliver makes it even better. The colors we chose represent Miami vice, they give good vibes and represent our city. The colors also match very well and relate to many things such as the iconic Miami Heat Jersey. The palm trees are also beautiful things we have all around campus. Seeing familiar things on the yearbook is a great thing as students will relate more to the theme and it really fits in.

At the start of the year, it really looked like we were living the dream. A beautiful new building on our campus in the heart of Miami. We were surrounded by glass building, palm trees, and all of our friends. The environment was perfect for us for socializing and learning.

And this year was a dream- We had spooky grams for halloween. We cheered at our teams' games. We did all sorts of fun games at Community Time. We had pep rallies in our new building and we made new friends.

By the last day of school, we'd done everything we'd wanted to do. We were living the dream.
